RasterPlus® Large Format

RasterPlus is the easiest to use large format RIP software on the market, giving you everything you need to create unsurpassed professional photographic quality prints. With built-in color management and true network print server power, it's ideal for corporate workgroups and photographic service bureaus that require the highest quality output from their large format printers, such as the Epson Stylus Pro 9000, 9500, 7000 and 7500.

File-Print Simplicity

You can print directly from your favorite application to RasterPlus. When you design your file at output size there's no need to change the scaling. Also, when you file-print with RasterPlus, all the necessary fonts are automatically included before printing. RasterPlus supports over 20 different file formats, so there's no reason to worry about converting file types either.

TrueGraphx™ Color Management

RasterPlus Windows Edition includes the TrueGraphx ICC color management system for all devices, including the latest 6-color printers. You can select the desired RGB, CMYK, Printer, Preview and Prepress profiles, or adjust the hue and contrast curves on a print by print basis. RasterPlus includes profiles for the original printer media types, or you can use your own ColorSync® color profiles. To make the best photo quality output, RasterPlus utilizes the patented Blue Noise Mask photo-screening technology.
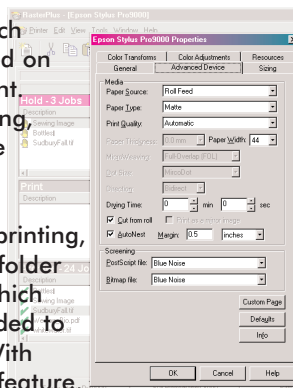

Print Server Power with AutoNest ™

RasterPlus is a true network print server, which means your large format printers can be shared on the network to any Windows or Macintosh client. You can take advantage of chooser-level printing, sending files directly from an application to the RasterPlus printer through the network.

RasterPlus on Win 2000 Server

You can also use Hot Folder printing, dropping files into a specified folder anywhere on the network, which will be automatically added to the RasterPlus queue. With the powerful AutoNest feature, RasterPlus automatically prints images across the page and helps save media.

Win NT 4.0 Workstation

Mac OS Workstation

Win 98 or XP Workstation

System Requirements

<u>Windows 95, 98, ME or XP:</u>
Pentium Class processor (150 MHz per device)
32 MB RAM per device
50 MB program and 50MB scratch HD space
<u>Windows NT 4.0 or 2000:</u>
Pentium class processor (200 MHz per device)
64 MB RAM per device
50 MB program and 50 MB scratch HD space
These specifications are recommended for each configured printer. Because RasterPlus Windows Edition is a 32-bit multitasking application, it will not run under Windows 3.xx.

Supported File Formats

Drag-N-Drop files to RasterPlus without first loading them into an application to print, saving valuable time. RasterPlus directly prints over 20 file formats including PostScript 3, PostScript Level 2, EPS, PDF, TIFF, JPEG, GIF, EXIF, BMP, PCX, TARGA, SUN Raster, CALS, GEM Image, Portable Network Graphics, Kodak Photo CD, Kodak FlashPix, MacPaint, Microsoft Paint, and native Photoshop PSD.

AutoNest™

RasterPlus Large Format features the AutoNest option to save you time and money.

Simply add your files to the queue and RasterPlus does the rest. RasterPlus can automatically determine the number of files that can be placed horizontally on the selected media.
There's no manual calculation to be done before printing and no need to reset the paper. Files are printed to your specifications without wasting costly media.

Optional Utilities

RasterPlus Workflow Tools:

Color Management & Screening

ICC ColorSync Color Profiles	YES
Blue Noise Stochastic/FM Screening	YES
Enhanced Error Diffusion Screening	YES
High Resolution Preview	YES

File Management

File-Print	YES
Drag-n-Drop Printing	YES
Scheduler Queue Printing	YES

File Tools

Custom Print Sizes	YES
Soft Proof (Rip to Screen Preview)	YES
Resize (Zoom and Resample)	YES
Crop and Move Print Files	YES
AutoSize to fill page (SmartFit)	YES
Image Antialiasing	YES
Built-in Font Manager	YES
Support for Fotoba® Print cutters	YES

Network Printing

Macintosh Clients	YES
Windows 95/98/NT/2000, ME,XP Clients	YES
File Hot Folder	YES

Power

RIP and Interpret on-the-Fly	YES
Multiple Processor Support	YES
TrueType or Type 1 Fonts	YES

Epson 7000-9500 Feature Support

Epson paper color profiles included	YES
6 color inks (CMYLcLmK)	YES
Interface	10/100 BaseTX or Parallel
Printer Resolutions Supported (DPI)	1440, 720, 360
Max print size	44"x1000"
Brightness, Hue, Saturation, RGB Balance, RGB Control Functions	YES

RasterPlus supports popular film recorders and printers manufactured by Polaroid, FUJI, Kodak, and Sony, and is available for both Windows and Macintosh platforms.
