

Windows Edition Summary

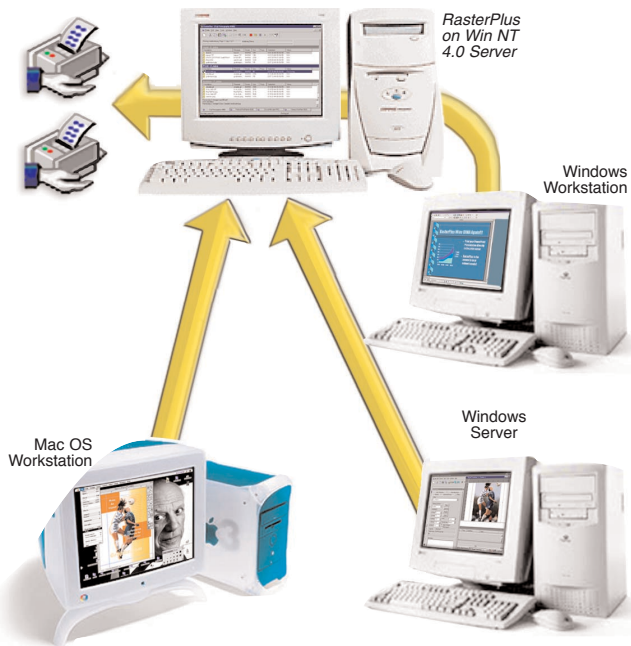

RasterPlus® Windows Edition is ideal for photo labs, service bureaus, corporate imaging centers, and desktop presenters who demand the most powerful photo-imaging solution for the Windows operating system. Whether you own Windows 95, 98, ME, NT, 2000, or XP, RasterPlus Windows Edition can dramatically improve the performance of your photorealistic printer, wide-format inkjet, and color film recorder.

The core features of RasterPlus include a File-Print interface with PostScript 3, drag-n-drop direct printing of many file formats, soft-proof print previews, print editing and unattended schedule printing. The Windows Edition of RasterPlus adds powerful print server features like full cross-platform networking, simultaneous multiple-device printing, automatic index prints and TrueGraphx® color management.

Network Printing

If you depend on printer sharing in mixed operating system environments, then RasterPlus Windows Edition is the ideal choice to maximize your printer connectivity. RasterPlus is a true enterprise-wide network print server because its printers can be published to any Macintosh or Windows client. Simply File-Print from any application and RasterPlus will do the rest!

Print jobs can be tailored to meet the specifications of the client, wherever they may be on the network. Each print queue is published independently, so clients can have their own queue to process and archive files. By publishing the PostScript printer description (PPD) files on the network, printer specific options are also available from within the client application print dialog.

"RasterPlus works great! I really like the new features, especially being able to network print and set print options directly from my Macintosh – Very cool!"

Curt Reif of Acme Photo-Finishing, Madison WI.

In addition to client network printing, you can use multiple hot folders with RasterPlus to process over 20 different file formats including PostScript 3, EPS, PDF, TIFF and JPEG. Just copy your files into the folder, and RasterPlus will immediately print.

Print Server Power

RasterPlus Windows Edition capitalizes on the Windows 95, 98, ME, NT, 2000, and XP processing technology by executing multiple complex tasks at the same time. The multi-threaded architecture makes very efficient use of the most powerful computers, including both single and multiple processor designs.

Since RasterPlus is a true multitasking print software, it can be used as a server for all your printing needs. Each attached device is given a dedicated driver and image rasterizer, so multiple printers - even from different manufacturers - can be used on the same computer. Now you can easily consolidate hardware costs and provide a common point of control for all your printers.

RasterPlus®

Windows
Edition

RasterPlus®

System Requirements

Windows 95, 98 ME or XP:

Pentium Class processor (150 MHz per device)
32 MB RAM per device, 50 MB program and 50MB
scratch HD space

Windows NT 4.0 or Windows 2000:

Pentium class processor (200 MHz per device)
64 MB RAM per device, 50 MB program and 50 MB
scratch HD space. These specifications are recom-
mended for each configured printer.

Supported File Formats

Drag-N-Drop files to RasterPlus without first loading
them into an application to print, saving valuable
time. RasterPlus directly prints over 20 file formats
including PostScript 3, PostScript Level 2, EPS, PDF,
TIFF, JPEG, GIF, EXIF, BMP, PCX, TARGA, SUN Raster,
CAL5, GEM Image, Portable Network Graphics,
Kodak Photo CD, Kodak FlashPix, MacPaint, Microsoft
Paint, and native Photoshop PSD (Version 3).

Font Manager

RasterPlus includes 35 popular PostScript compatible
fonts. Additional PostScript Type 1 fonts can be
added for processing EPS or Postscript files that do
not include fonts. Also when directly File-Printing to
RasterPlus, all the necessary fonts are automatically
included before printing. Either way, you can finally
say goodbye to font substitution errors.

Optional Utilities

PackagePlus®, available for select printers, lets you cus-
tomize photo packages to use with
RasterPlus. Get creative with
PackagePlus by adding image over-
lays, logos and colored borders to
your prints. Use your imagination to
create multiple pages with unique sizing and cropping,
then save your collections as templates for future jobs.
Support for Fotoba® print cutters is built-in.

PackagePlus runs on Microsoft Windows
95/98/ME/NT4/2000/XP and can reside on the same
or separate computer as RasterPlus.

File Output with BitmapPlus®

Drag and drop over 20 different types of files, includ-
ing PDF and Postscript, into a print queue where they
will be rasterized, sized and processed into one of 10
different bitmap file formats. File Print from any
application to one of 10 different bitmap file formats.

RasterPlus Macintosh Edition

The Power of RasterPlus is also available for the
Macintosh OS 8.5 or later, perfect for hosting printers
on your Macintosh.

Film Recorders Supported

Manufacturer	Device Models	Part Number
AGFA	Forte, Forte Plus, Alto, Alto LS, Fotopro	RPW-AG1
AGFA/Matrix	PCR, PCR II, PCR II Plus, FotoColor, ProColor, Premier	RPW-AG2
Celco	ProSlide 35 eXtreme MRP/MPX, eXtreme Nitro, Professional	RPW-CO1
CCG	PCR 16, PCR 8	RPW-CG1
CCG	PCR 4 PCR P	RPW-CG2
Lasergraphics	Mark V DPM, Mark VI DPM Mark II, Mark II DPM, Personal LFR, Personal LFR+, LFR-X, LFR-X95	RPW-LG1
MGI	Cine II, Cine III, Gemini 16xps, Solitaire 16xps, Solitaire 4, Solitaire 8, Solitaire 16	RPW-MG1
MGI	Sapphire Pro, Sapphire, Opal Opal Plus	RPW-MG2
Mirus	Galleria, GalleriaPro, GalleriaPro8 GalleriaPro E, Turbo II	RPW-MR1
Montage	Montage FR2 Enhanced	RPW-MO1
	ProPalette 7000, HR6000, CI-5000(S), CI3000(S),	RPW-PL1
Samurai	Samurai	RPW-SAM
Upgrade Technologies	Phoenix 2K, 4K, 8K, 16K	RPW-UT1

Color Printers Supported

Epson	Stylus Pro 9000, 9500, 7000, 7500	RPW-EP1
Fuji	Pictography 4000-II, 4000, 3500, 3000, Pictostat 400	RPW-FJ2
Kodak	XL7700, XLT7720 XL8650, 8660, 8670	RPW-KD1
Polaroid	PL-D8800	RPW-SY2
Sony	UP-D8800, UP-D70A	RPW-SY2

Mini Labs Supported

Gretag	FotoPrint 500, 1000, 3000, 5000	RPW-SN1
Gretag	Netprinter/Mileca	RPW-GR1
Kodak	Kodak/Noritsu 2711 DLS	RPW-DLS
